nonprovisional	NO	\$1510	\$0	\$0	\$1510	05/02/2011

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 569 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 569 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Examiner's Statement of Reasons for Allowance

1. Claims 1, 3-7, 10-12, 16, 18-20, 23-25, 38, 41, 54 and 55 are allowed over the prior art made of record.
2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter: Claims 1, 3-7, 10-12, 16, 18-20, 23-25, 38, 41, 54 and 55 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior arts.

The prior art of records teaches in the same field of invention. Prior art of record Schumacher et al. (US Patent No. 6,631,345) discloses a method, system, and computer program product for emulating a sequence of events resulting from user interaction with an applet in which the storing and retrieval of queued event objects is facilitated through the use of an index to a component vector, Schumacher, Abstract and Col 2, lines 14-17. Prior art of record Chang et al. (US Patent No. 6,968,509) teaches CPU receives user activities such as keystrokes on the keyboard. CPU executing dynamic-link library that access window messages from the window of the application with focus to the operating system of the computer, Chang, Col 5, lines 4-10, Col 6, lines 4-10 and Figs. 2-3. Furthermore, Chang teaches that the ... focus of the application includes where a mouse pointer is located on a graphical user interface of the application, such as a focus on a particular button of a toolbar that causes the button to have a raised

appearance. ... The focus that results from each change of focus is logged. When a window message occurs, a focus that has been logged and the user activity of the window message can be recorded to specify the user-driven event, Chang, Col 1, lines 54-67. The prior art of record Gray et al. (US patent Application No. 2005/0060719) teaches a method for capturing user events that are associated with screen objects on a computer display so that the events may later be reproduced. An event engine captures user events, such as keystrokes and mouse clicks, through application programming interfaces (APIs) that are supported by the applications being monitored.

However in contrast to Applicant's claim 1, the cited references in combination or alone do not disclose "receiving, ..., the first application with focus comprising an application being used by a user of the computer to enter text; determining, focus has changed from the first, ... , wherein focus changes when the user switches from using the first application to using the second application to enter text; resetting, with the capture processor, the keystrokes captured from the first application by clearing the captured keystrokes responsive to determining that the focus has changed".

Although using similar language of "change" and "focus", Chang's change in focus is simply a mouse pointer moving from one button to another button within a single application. Unlike the claimed invention, Chang does not disclose change in focus between multiple applications as recited in claim 1, "determining, with the capture processor, that focus has changed from the first application monitored by the capture processor to a second application

monitored by the capture processor, wherein focus changes when the user switches from using the first application to using the second application to enter text". Gray's event engine does not reset any of the events received from the APIs when the user switches from one application to another. Gray does not highlight any specific actions that are performed responsive to a focus change, let alone an action that involves resetting. Moreover, Gray does not disclose any relationship between resetting memory and initializing states aside from the fact that both are triggered by pressing the "new" button. In other words, Gray does not reset memory responsive to initializing states. Accordingly, Gray does not disclose "resetting, with the capture processor, the keystrokes captured from the first application by clearing the captured keystrokes responsive to determining that the focus has changed."

Similarly, in contrast to Applicant's independent claim 16, the cited references in combination or alone do not teach or suggest that "receiving, with the capture processor, a plurality of display calls ... an application being used by a user of the computer to enter text; determining, with the capture processor,, wherein focus changes when the user switches from using the first application to using the second application to enter text; resetting, with the capture processor, the display calls received from the first application by clearing the received display calls responsive to determining that the focus has changed".

Similarly, in contrast to Applicant's independent claim 38, the cited references in combination or alone do not teach or suggest that "program code configured to receive a plurality of keystrokes associated ..., the first application

with focus comprising an application being used by a user of the computer to enter text; program code configured to determine that focus has changed from ..., wherein focus changes when the user... using the second application to enter text; program code configured to reset keystrokes ... received keystrokes responsive to determining that the focus has changed".

Independent claim 41 is similar to that of the independent claim 38 and is allowable for the same reason as claim 38. The dependent claims, being further limiting to the independent claims, definite and enabled by the Specification are also allowed.

3. As per the rejection of claims 1, 16, 38 and 41 under 35 U.S.C. 112 imposed in the previous Office Action, the rejection has been withdrawn because of the amendment to the claims.

4. Computer-readable storage medium as recited in the claims 38 and 41 is considered as physical hardware such as removable/non-removable, volatile/nonvolatile computer storage media such as CD-ROM, ROM, RAM etc. as defined in the Applicant's specification on pages 4-5, [0013-0014].

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Weber et al. (US Patent No. 5,305,205) discloses computer-assisted transcription apparatus.

Kodimer (US Patent No. 5,781,192) discloses a data transfer system.

Hejlsberg et al. (US Patent No. 7,546,602) discloses an application program interface for network software platform.

Hinckley et al. (US Patent No. 7,602,382) discloses a method for displaying information responsive to sensing a physical presence proximate to a computer input device.
